2) i. db. createCollection ("customers");

(ii).

```
db. customers. insertMany ([
{ cust-id:1, acc-bal : 4000, acc_type :" savings"},
{ cust-id:2, acc-bal: 5000, acc_type : "current"},
{ cust-id:3, acc-bal: 900, acc-type : "savings"},
{ cust-id:4, acc-bal:2000, acc-type : "current"}]);
```

(iii).
```
db. customers. find ({ "acc-bal" : {$gt: 1200 }},
{ acc-type : " savings" }});
```

iv)
```
db. customers. aggregate ([
{    id: "$ cust-id",
   man_bal : { $man : "$ acc_bal" },
   min_bal : { $min : "$ ac-bal" }
}]);
```

v)
```
mongoexport -d. customerDB. -c customers
-- type csv -o customers.csv.
```

vi)   db. customers. drop ()

vii).   mongoinport -d customers DB - c customers
     --type csv --file customers. csv.
